

## Auto Cup Mask Machine (SE-CMM09)

### Summary

Auto cup mask machine is the most advanced auto cup mask producing equipment inland at present. Auto cup mask machine can shape, press and scrap the cup mask with 3-ply or 4-ply materials which is a collection of multi function and the product is single cup mask. Auto cup mask machine with high efficient and saving workers which can operate three machines by one worker and can produce 8 to 12 piece cup masks /minute. Auto cup mask machine have steady performance, low noise and continuous working. Auto cup mask machine controlled by PLC, advanced and intuitive. Aluminum's alloy structure with non rust. Saving workers immensely and enhancing the efficient. Auto cup mask machine apply to cup mask, gas mask and N95 mask producing.

## Technical Data

<b>Model</b>	<b>SE- CMM09</b>
<b>Voltage</b>	<b>220 V</b>
<b>Power</b>	<b>2000W</b>
<b>Frequency</b>	<b>20KHZ</b>
<b>Weight</b>	<b>280KG</b>
<b>Size</b>	<b>1500 * 1500 * 1850mm</b>

## Functions and Features

- ✓ High efficiency and batch production;
- ✓ None auxiliary material, harmless;
- ✓ Firmly bonded, no distortion or damaged;
- ✓ High air tightness and water tightness;
- ✓ Piezoelectric ceramic transducer imported, output is strong and stable;
- ✓ Anti-backwards and coaxial direct pressure design, pressure exerted evenly, improve welding precision;
- ✓ Touch screen, parameter set intuitional and exact;
- ✓ Imported main electrical components;
- ✓ Sophisticated PLC control circuit, automatic overload protected system;
- ✓ High precision segmentation imported from Taiwan, no error; NC switch, progress up to 0.01;
- ✓ Unique design of level screw, mould is easier to debug;
- ✓ High Q value transducer, output power strong;
- ✓ Turbine design, adjust trip easily; alloy amplitude transformer, strong and stable ultrasound
- ✓ Electrical components, high performance.
